

Strategic partnerships,
emerging technologies and
diverse talent to accelerate
digital transformation

Mark Saunders, Executive Vice-President and CIO
Sun Life

Digital Transformation Conference and Awards - August 8, 2019

How have Canadian businesses progressed on their digital transformation journey?

Where we were...

Where we're headed...

- Entrenched
- Slow to adapt and slow to adopt
- Hierarchical organizational structure
- Time consuming strategic decision-making
- Lack of representation and workforce diversity

- Open to change
- Quick to adapt and eager to adopt
- Fluid organizational structure and agile teams
- Accelerated strategic decision-making
- Increasingly diverse workforce

Where have we landed?

Businesses are moving faster than ever in responding to industry disruption

**More resilient and
responsive to market
headwinds**

**Proactive in
identifying coming
disruption**

**IT collaborating
hand-in-hand with
the business**

**Commitment to
workplace and
cultural
transformation**

Attracting top talent

Building the workplace of the future

Pushing workplace layouts beyond conventional models to focus on multifunctional arrangements that take the co-working trend to a new level.

Creating workplaces with fiber optic technology in the outer walls to monitor temperature, floor to ceiling windows for natural light and embedded outdoor spaces.

Rethinking furniture design to facilitate mobility with workstations that can be pushed aside when unused and have self-powering capabilities for tech needs.

Using vacant buildings to provide workplaces for businesses or traveling workers in need of a focused work environment and that highlight historical elements of the space.

Emerging technologies present new opportunities to explore

Artificial intelligence
and machine learning

Cloud-based
infrastructure and
solutions

Natural language
processing, voice
technologies

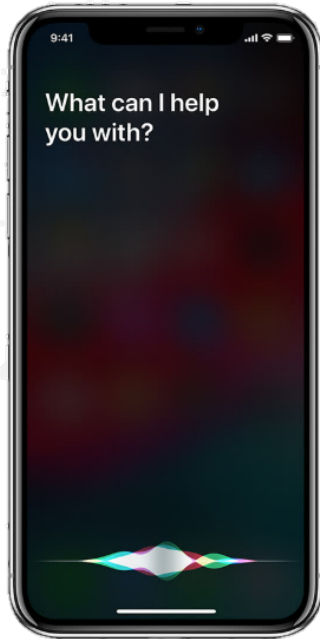

Blockchain solutions

Web and mobile

The rise of the voice assistant

What I think the next 10 years will look like...

- ✓ Emerging technologies are here to stay for our clients
- ✓ Data will support these technologies in new ways
- ✓ These technologies will require talent to harness
- ✓ Diverse and inclusive workforces will be critical to success
- ✓ Our workplaces will continue to evolve by creating new ways of working and opportunities to partner internally
- ✓ Strategic partnerships will fill the white space in expertise and help to deliver on changing client needs
